

# Triplan

SEBA Master  
Web Application Engineering  
Team 05  
Technical Description

# Business Idea

Triplan is a smart travel planning platform to help travelers to avoid the stress and hassle of trip planning by not only saving them time, but also getting them great discounts and the opportunity to visit the places liked by the people they follow with the help of its optimized route planning algorithms built onto a user-friendly interface.

**Solving potential money issues and providing money saving opportunities**

**Easy, fast, optimized**

**Personalized with people they care**

# Use Cases

1

Searching a destination and filtering recommended options for planning the trip

2

Completing planning a trip with adding destinations, paying tickets & menus, and getting trip information

3

Reviewing and rating past trips

4

Partner locations creating/editing their own profile pages
